INTERNSHIP

Webnox Technologies 2026

Built cross-platform mobile applications using Flutter and Dart. Integrated Firebase and Dio for authentication, database management, push notifications, API integration, and real-time data handling.

MERN Stack Intern-Algo Tutor 2025

Worked on building full-stack web applications using MongoDB, Express.js, React, and Node.js, gaining hands-on experience in REST APIs, frontend development, backend integration, and deploying functional web solutions.

PROJECTS

Campus Project Collaboration Hub [Github](#) 2026

Developed a cross-platform mobile application that enables students to discover academic projects, request participation, manage project tasks, communicate through real-time chat, and access shared learning resources. Integrated Firebase Firestore for real-time synchronization, Firebase Cloud Messaging for instant notifications, and local storage for user preferences. Implemented project marketplace, mentor requests, progress tracking, and notification management.

FocusLock - Parent-Controlled Study Mode System [Github](#) 2025

Developed a full-stack parent-controlled study monitoring system with React, Node.js, Express, MySQL, and a Chrome Extension featuring OTP-secured study mode, real-time website blocking, activity tracking, and role-based access control. Built real-time website blocking, YouTube content filtering, activity tracking, and an early-exit approval workflow.

Smart Tourist Guide Mobile Application [Github](#) 2026

Built a mobile tourism application providing destination discovery, secure authentication, interactive navigation, and personalized travel information. Integrated Firebase for authentication and cloud data storage while implementing local persistence using Shared Preferences. Designed an intuitive user interface for seamless travel planning.
